

# BITDOGE

WHITEPAPER V1.0

## Overview

### **BitDoge is inspired by Bitcoin and Dogecoin The People's Crypto**

BitDoge is much faster, much greener and near zero fee

### **BitDoge was created based on Shiba Inu Meme**

Combined Power of Bitcoin, Dogecoin and Stellar

Elon Musk's vision, "People's crypto must have fast transaction, low fee and eco friendly".

BitDoge is The Rarest, The Fastest and The Greenest version of Dogecoin.

BitDoge is very fast (1500+ TPS), it needs only 3-5 seconds for transaction confirmation.

BitDoge fee is \$0.000005 per transaction.

BitDoge is much greener than Dogecoin, no mining power needed.

## The Problems

Bitcoin, the first and the most popular cryptocurrency, can make transactions more efficient globally. It needs only a wallet to transfer Bitcoin, and it can be sent to any places in the world as long as internet exist.

But Bitcoin have scalability problem, high network fee and environmental issues. Bitcoin blockchain can process only 7 transactions per second. It needs more than an hour to receive a payment.

Bitcoin network fee cost 2-6 USD per transaction, so it is not suitable for microtransactions.

The biggest problem is environmental issues. Bitcoin mining needs electricity power to mined.

On March, 2021, the annual power consumption of the Bitcoin network was estimated to be **129 terawatt-hours (TWh)**.

That is the same power consumption of Norway.

Are there any cryptocurrencies better than Bitcoin?

The answer is yes. Many cryptocurrencies are better than Bitcoin.

And The People choose Dogecoin.

Why Dogecoin?

Dogecoin is more greener than Bitcoin, Dogecoin power consumption is 5800 times lower than Bitcoin.

Dogecoin average transaction fee is around \$0.6, it is lower than Bitcoin, but it still not suitable for microtransactions.

With 40-70 TPS, Dogecoin needs around 1-6 minutes to confirm a transaction. And it is better than Bitcoin.

But Dogecoin has a weakness, Dogecoin supply is unlimited. While Bitcoin supply is capped at 21 millions, no more Bitcoin can be created.

Every 1 block time (1 minute) of Dogecoin, 10,000 new Dogecoin is created and added to circulating supply.

So there are 14,400,000 new Dogecoin created everyday.

What do you think about this?

Both Dogecoin and Bitcoin have weaknesses.

## The Solution

BitDoge was created to eliminate Bitcoin and Dogecoin weaknesses. BitDoge is powered by Stellar Network that can process more than 1500 transactions per second.

BitDoge has lightning speed of transaction, it needs only 3-5 seconds to confirm a transaction.

BitDoge has Ultra low transaction fee, around \$0.000005 per transfer, so BitDoge is suitable for microtransactions.

You can even pay for a thing at a cent, without losing another cent or \$0.6 or even \$6.

BitDoge is eco green, no mining power needed, it is much greener than Dogecoin.

BitDoge power consumption is 15 times lower than Dogecoin, it means 87000 times lower than Bitcoin.

Like Bitcoin, BitDoge supply is capped at 21 millions, no more BitDoge can be added in the future, because BitDoge issuer account has been locked.

### Power consumption per transfer

Bitcoin : 700 KWh  
Dogecoin : 0.12 KWh  
BitDoge : 0.0079 KWh

## ROADMAP

Q2 2021 – Token creation

Q2 2021 – Website Launch

Q2 2021 – BDOGE is listed on Stellar DEX

Q3 2021 – Apply to CMC and Coingecko

Q3 2021 - Marketing

Q3 2021 – Reward to Community

Q3 2021 – Listing on other Exchanges

Q3 2021 – Partnership

Q4 2021 – Future Development

## BitDoge Token

Token Name : BitDoge

Symbol : BDOGE

Decimals : 7

Max Supply : 21,000,000

Platform : Stellar Network

Issuer Address:

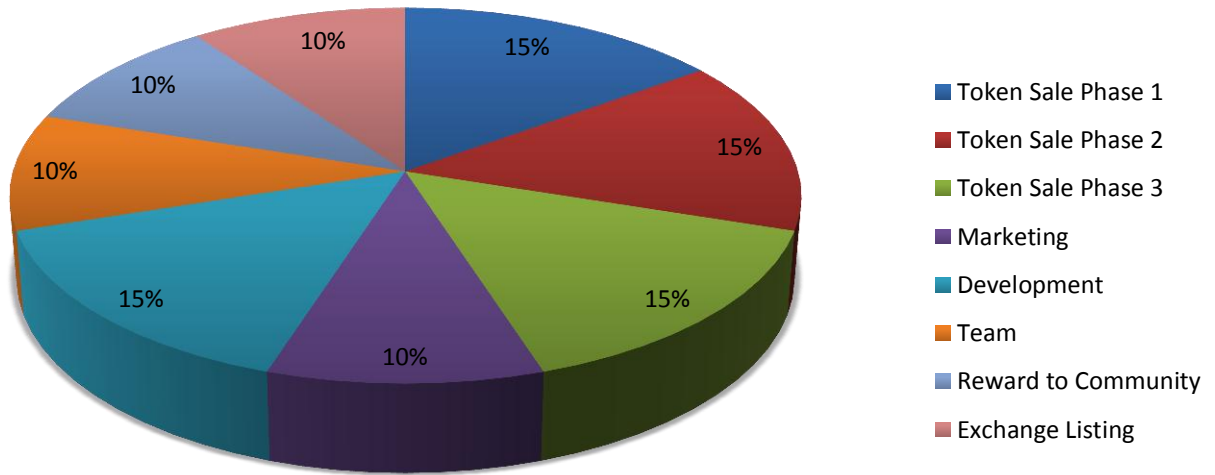

GB52ACWTCWOYQFP5IQIZTFWSJTH5UNXD2TALKJWCNZNZ2B4INUXTKD  
OG

Explorer :

<https://stellar.expert/explorer/public/asset/BDOGE-GB52ACWTCWOYQFP5IQIZTFWSJTH5UNXD2TALKJWCNZNZ2B4INUXTKDOG>

## Token Distribution

## Exchange

### Stellarterm

<https://stellarterm.com/exchange/BDOGE-GB52ACWTCWOYQFP5IQIZTFWSJTH5UNXD2TALKJWCNZNZ2B4INUXTKDOG/XLM-native>

### Stellarport
